ABB Oyj

December 10, 2017

It is with great pleasure that I am applying for the open position of a Project Supply Chain Manager in your company. I am interested in the open position due to my experience in the logistics, supply chain operations and contracts. I believe that my good overview of the supply chain operations together with my experience with contracts and claims and educational background provide good prerequisites for succeeding in the position.

I have graduated from Satakunta University of Applied Sciences International Business with focus on Cross-Cultural Business Relations, where I concentrated in various aspects of foreign trade, among which movement of goods, international marketing, cultural studies and global project management. My studies allowed to immediately start working in the international import/export sector of commodities. In the following ten years my career has consisted of proficuous experiences in different companies, in each of which I was able to both improve my skills, professionally and personally, as well as to contribute to the success of the company. Even though each step meant to abandon a position I was competent in to start a new experience somewhere else, I found each of such steps to be a fundamental one in my professional growth, as it forced me each time to expand my knowledge and to learn new aspects of the business, as well as to explore new markets. The last big step was to join NEOT in 2012 where for 4+ years I worked as an Logistics and Operations Coordinator, before being promoted to the position of Contract Manager and Demurrage Specialist.

Joining your team at ABB would be an exciting opportunity to fully express my potential, by being part of a leading technology company whose dynamics position in the market would represent for me a daily source of professional growth for the foreseeable future. On my part, I can guarantee that I will contribute to ABB not only with enthusiasm, but also with precision, professionalism and excellent organizational skills, for which I have received good feedback from my supervisor and from my other colleagues.

Yours faithfully,

Maarit Aalto
